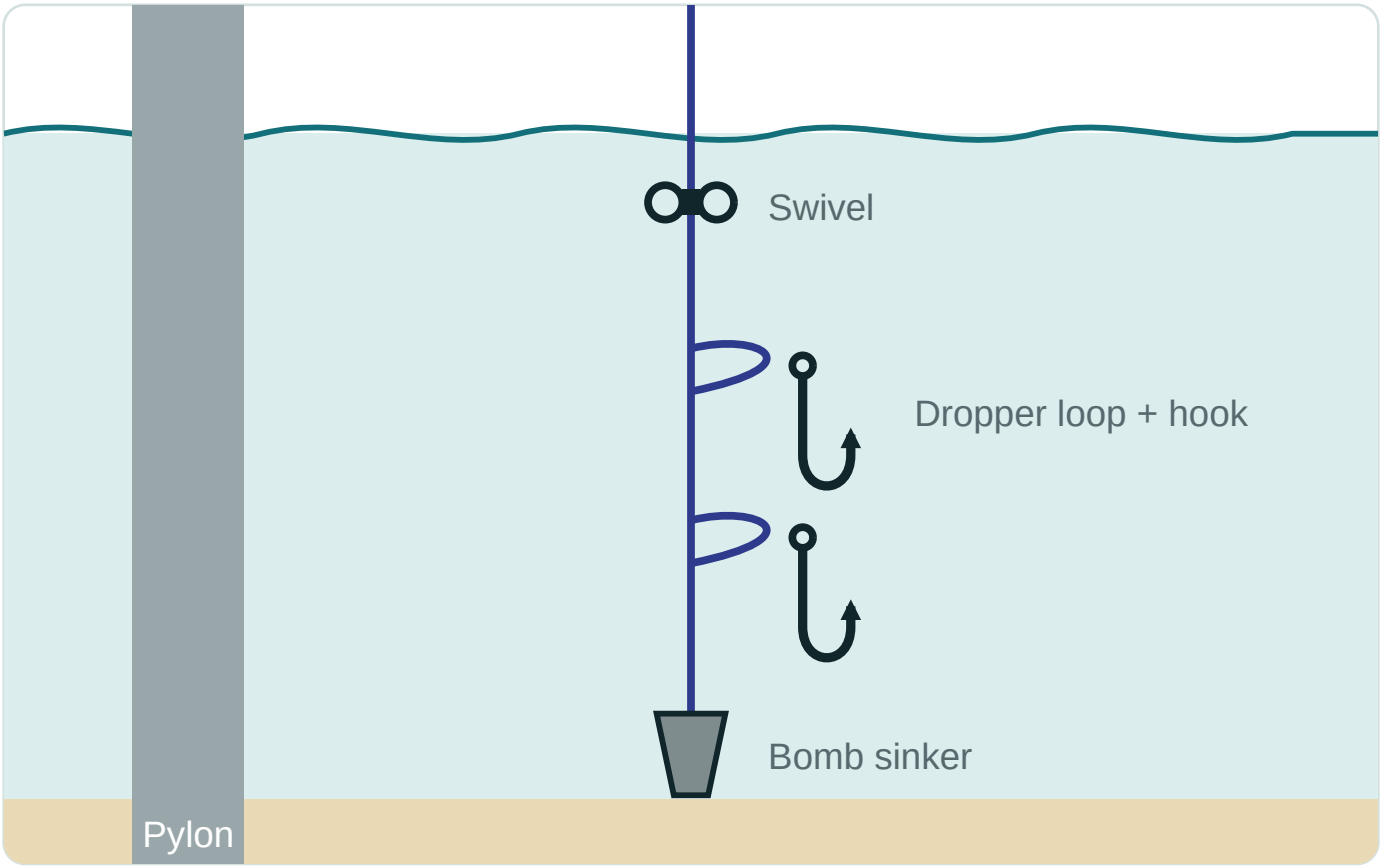
FISHY FRIENDS GUIDE

Paternoster rig

Good for: Leatherjacket, Trevally, Bream, Snapper

Two hooks above a sinker. Great off wharves and rocks because the baits sit up off the bottom, away from snags.



YOU NEED

Bomb sinker, 1 m of leader line, two small long-shank hooks (size 8 to 4), bait.

STEPS

1. Tie a dropper loop about 30 cm from the end of the leader, and another 30 cm above it.
2. Tie the bomb sinker to the very end of the leader.
3. Thread a hook onto each loop (pass the loop through the hook eye and over the hook).
4. Tie the top of the leader to your main line with a swivel.
5. Lower it straight down beside the pylons until the sinker touches bottom, then wind in a little.
6. Strike quickly. Leatherjackets are fast nibblers!

KID TIP Drop it straight down next to the wharf. No big cast needed!

STAY SAFE Hold onto the rail and never lean over the edge of a wharf.
