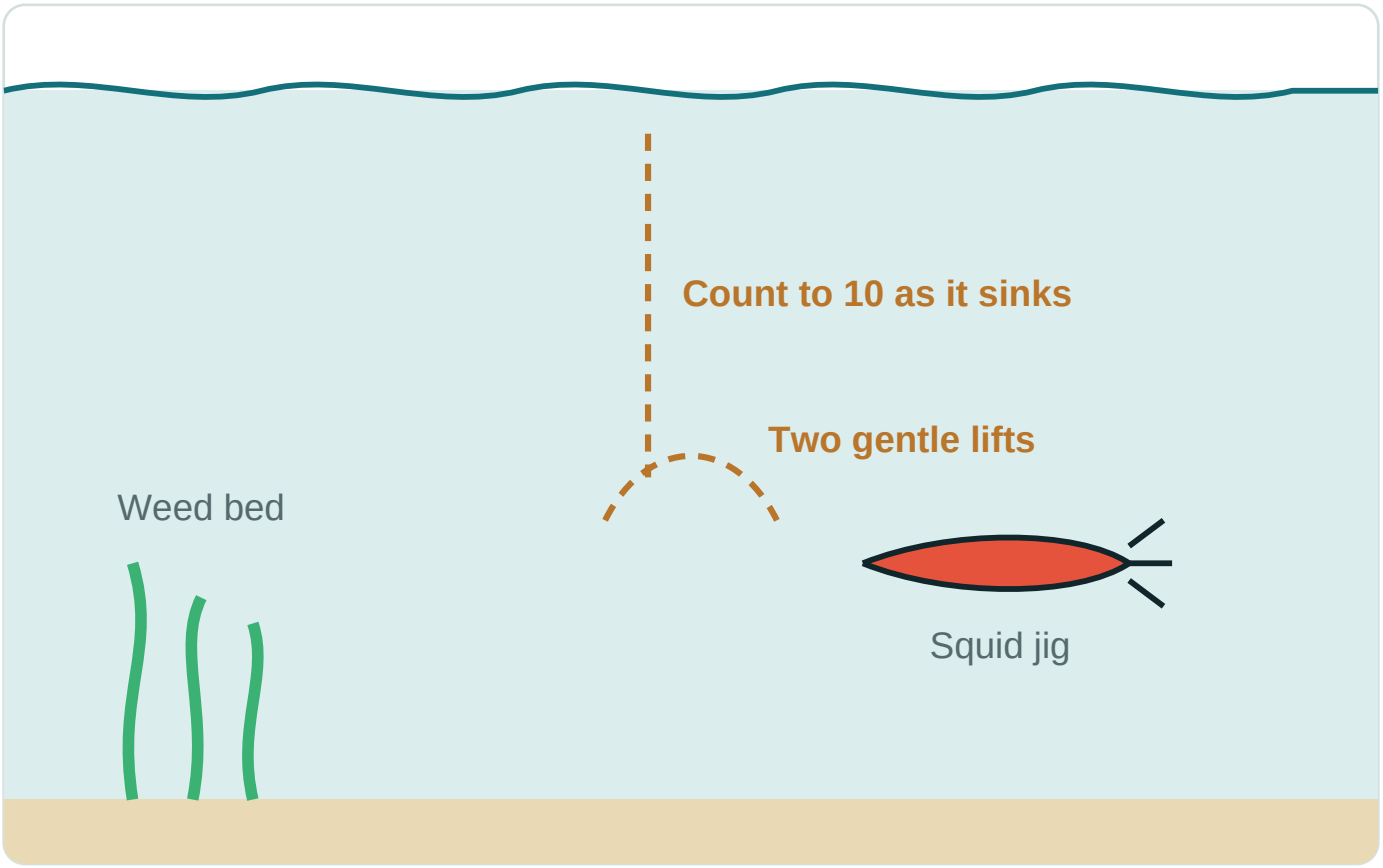
FISHY FRIENDS GUIDE

Squid jigging

Good for: Squid

Squid hunt by sight, so calm, clear water is best, especially at dawn, dusk and under wharf lights at night.



YOU NEED

Size 2.0 to 3.0 squid jig, light rod, bucket for the squid (they squirt ink!).

STEPS

1. Tie the jig straight to your line with an improved clinch knot or a small snap.
2. Cast out near weed beds or the edge of wharf lights.
3. Count to 10 while it sinks (longer in deeper water).
4. Give the rod two gentle lifts, then let the jig sink again on a slack line.
5. Squid grab the jig as it sinks. When it feels heavy, wind smoothly. Don't jerk.
6. Lift the squid out pointing away from you and drop it into the bucket.

KID TIP Squid squirt ink when they're lifted out. Point them away from your clothes!

STAY SAFE Squid jig hooks are very sharp: hold the jig by its body, not the spikes.
