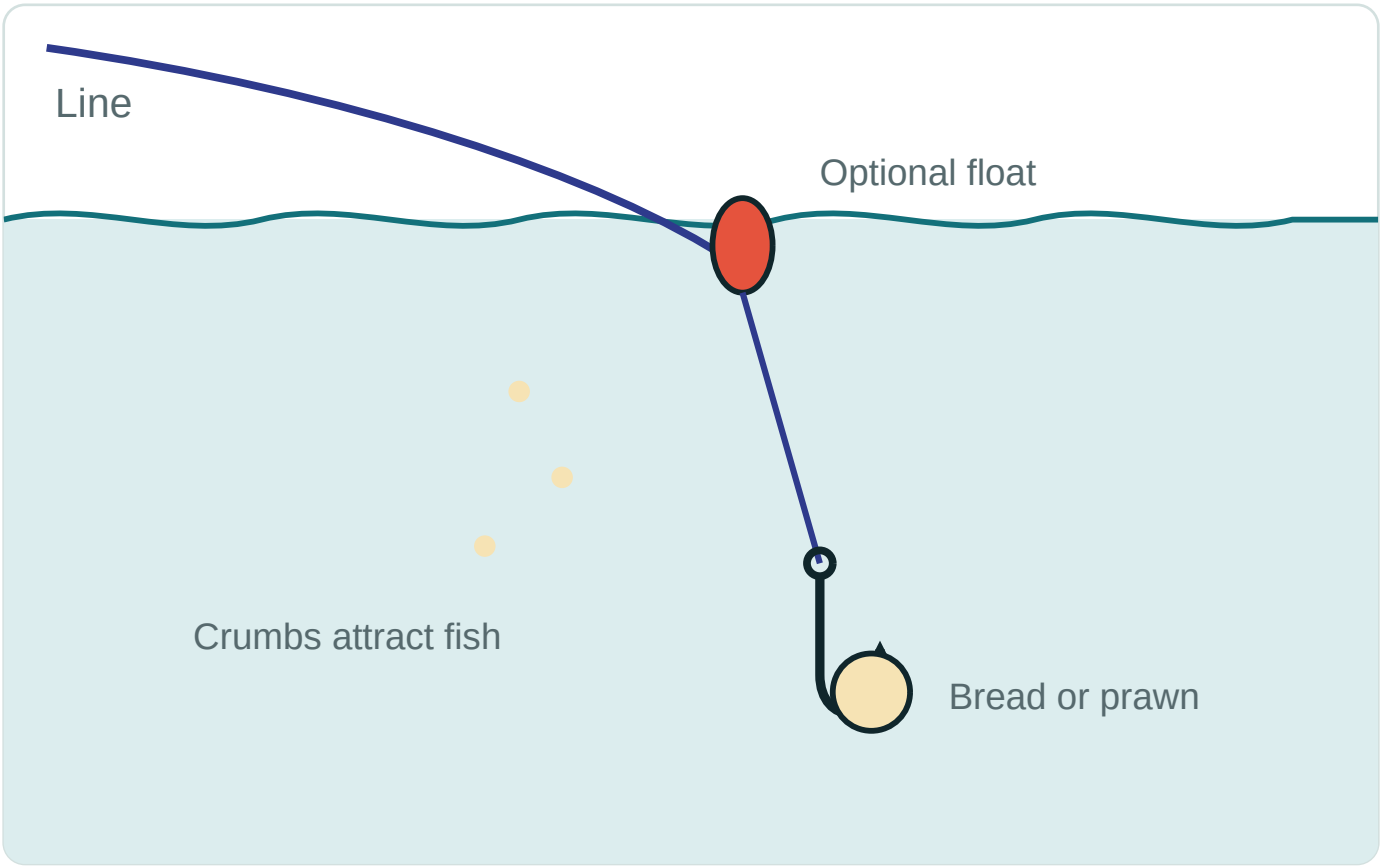
FISHY FRIENDS GUIDE

Unweighted bait rig

Good for: Bream, Mullet, Luderick, Trevally, Snapper

The simplest rig there is: just a hook and bait. It drifts down slowly and naturally, which fussy fish love.



YOU NEED

Small hook (size 10 to 4), light line, bread or a small piece of prawn. Optional: a small float.

STEPS

1. Tie the hook straight onto the end of your line.
2. Squeeze a small piece of bread or prawn onto the hook so the point is covered.
3. Flick it out gently. There's no sinker, so it doesn't need to go far.
4. Let it sink slowly. Throw a few crumbs in the water nearby to attract fish.
5. For luderick or mullet, clip on a small float so you can see bites.
6. When the float dips or the line moves off, lift the rod.

KID TIP Best rig for first-timers. Bread and a tiny hook catch mullet almost anywhere!

STAY SAFE Keep the hook covered or in a cork when you're not fishing.
